PROFESSIONAL SUMMARY

Motivated and detail-oriented Electronics and Communication Engineering student with a strong foundation in IoT, Embedded Systems, and Web Technologies. Skilled in C programming, basic Python, Arduino concepts, and sensor-based applications. Passionate about developing innovative technology solutions that enhance safety, automation, and energy efficiency. Seeking opportunities in IoT, Embedded Systems, Electronics, or Software Development to apply technical skills and contribute to impactful projects.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics and Communication Engineering (ECE)

Sree Chaitanya College of Engineering

Expected Graduation: 2027

Intermediate (MPC)

SR Junior College

Percentage: 93% | 2023

Secondary School Certificate (SSC)

Rishi Convent High School

GPA: 10.0

TECHNICAL SKILLS

Programming Languages: C, Python (Basic)

Web Technologies: HTML, CSS, JavaScript

IoT & Embedded Systems: Arduino Basics, Sensors, Embedded Concepts

Tools & Platforms: GitHub, VS Code

Operating Systems: Windows, Linux (Basic)

PROJECTS

IoT-Based Smart Helmet

Technologies: IoT Sensors, Embedded Systems

- Designed and developed a smart helmet prototype aimed at improving rider safety and accident prevention.
- Integrated multiple sensors to monitor rider conditions and detect emergency situations.
- Implemented accident detection mechanisms for faster response and enhanced road safety.
- Demonstrated practical application of IoT technology in transportation safety solutions.

Smart Street Light System

Technologies: IoT Sensors, Automation Systems

- Developed an intelligent street lighting system to optimize energy consumption.
 - Automated light control based on ambient sunlight conditions.
 - Integrated motion detection to adjust brightness levels when vehicles or pedestrians were present.
 - Contributed to improved public safety while reducing unnecessary energy usage and operational costs.
-

CERTIFICATIONS

- **C Programming (Basics)** – Programming Fundamentals and Problem-Solving
 - **PCB Design Workshop** – Fundamentals of Circuit Design and PCB Development
-

ACHIEVEMENTS

- Participated in multiple technical workshops and seminars focused on emerging technologies.
 - Maintained strong academic performance throughout educational career.
 - Demonstrated continuous learning through practical projects in IoT and Embedded Systems.
 - Collaborated effectively in project teams to design and implement innovative solutions.
-
